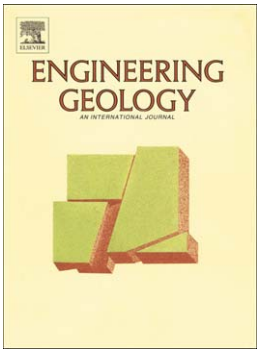
Accepted Manuscript



Application of near-surface seismic refraction tomography and multichannel analysis of surface waves for geotechnical site characterizations: A case study

Ehsan Pegah, Huabei Liu

PII: S0013-7952(16)30105-3
DOI: doi: 10.1016/j.enggeo.2016.04.021
Reference: ENGEO 4273

To appear in: *Engineering Geology*

Received date: 13 October 2015
Revised date: 19 April 2016
Accepted date: 21 April 2016

Essential title page information:

Title of manuscript:

Application of near-surface seismic refraction tomography and multichannel analysis of surface waves for geotechnical site characterizations: a case study

Authors names and affiliations:

Ehsan Pegah, Huabei Liu

School of Civil Engineering and Mechanics, Huazhong University of Science and Technology, Wuhan, China.

Email addresses: epegah@hust.edu.cn (E. Pegah), hbliu@hust.edu.cn (H. Liu).

Corresponding author

Prof. Huabei Liu

Address: School of Civil Engineering and Mechanics, Huazhong University of Science and Technology, Wuhan City, Hubei Province, China.

Postal Code: 430074

Email: hbliu@hust.edu.cn

Tel: +86-27-87557960
