Review article

Current status and future direction of biodegradable metallic and polymeric vascular scaffolds for next-generation stents

Seung Hyuk Im, Youngmee Jung, Soo Hyun Kim

PII: S1742-7061(17)30456-7

DOI: <http://dx.doi.org/10.1016/j.actbio.2017.07.019>

Reference: ACTBIO 4986

To appear in: *Acta Biomaterialia*

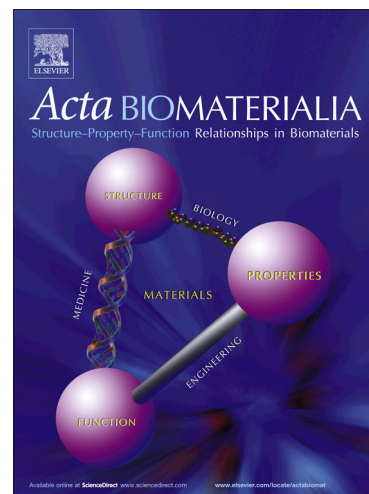

Received Date: 20 March 2017

Revised Date: 4 July 2017

Accepted Date: 12 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Current status and future direction of biodegradable metallic and polymeric vascular scaffolds for next-generation stents
