A nano-scaled and multi-layered recombinant fibronectin/cadherin chimera composite selectively concentrates osteogenesis-related cells and factors to aid bone repair

Junchao Xing, Tieniu Mei, Keyu Luo, Zhiqiang Li, Aijun Yang, Zhilin Li, Zhao Xie, Zehua Zhang, Shiwu Dong, Tianyong Hou, Jianzhong Xu, Fei Luo

PII: S1742-7061(17)30121-6  
DOI: <http://dx.doi.org/10.1016/j.actbio.2017.02.016>  
Reference: ACTBIO 4737

To appear in: *Acta Biomaterialia*

Received Date: 13 September 2016  
Revised Date: 5 February 2017  
Accepted Date: 9 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
