An experimental study of two-phase pressure drop of acetone in triangular silicon micro-channels

Yunhua Gan, Jinliang Xu, Yuying Yan

PII: S1359-4311(15)00043-5

DOI: [10.1016/j.applthermaleng.2015.01.038](https://doi.org/10.1016/j.applthermaleng.2015.01.038)

Reference: ATE 6307

To appear in: *Applied Thermal Engineering*

Received Date: 20 October 2014

Accepted Date: 13 January 2015

Please cite this article as: Y. Gan, J. Xu, Y. Yan, An experimental study of two-phase pressure drop of acetone in triangular silicon micro-channels, *Applied Thermal Engineering* (2015), doi: 10.1016/j.applthermaleng.2015.01.038.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
