This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evaluation of Heat Transfer Coefficient between Polymer and Cavity Wall for Improving Cooling and Crystallinity Results in Injection Molding Simulation

Abbreviated title: Heat Transfer Coefficient in Molding

Author names and affiliations:

Yao Liu, Michael Gehde

Chemnitz University of Technology, Department of Mechanical Engineering, D-09107
