Analysis on performance characteristics of ejector with variable area-ratio for multi-evaporator refrigeration system based on experimental data

Cui Li, Yanzhong Li, Wenjian Cai, Yu Hu, Haoran Chen, Jia Yan

PII: S1359-4311(14)00295-6

DOI: [10.1016/j.applthermaleng.2014.04.031](https://doi.org/10.1016/j.applthermaleng.2014.04.031)

Reference: ATE 5555

To appear in: *Applied Thermal Engineering*

Received Date: 17 December 2013

Accepted Date: 13 April 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis on performance characteristics of ejector with variable area-ratio for multi-evaporator refrigeration system based on experimental data
