CHEMICAL ENGINEERING SCIENCE

Volume 158 **2 February 2017**

CONTENTS

Biochemical Engineering

S. Wang, **Z. He** and **Q. Yuan** 37 Xylose enhances furfural tolerance in *Candida tropicalis* by improving NADH recycle

R.A. Rodríguez-Hinestroza, **C. López**, **J. López-Santín**, **C. Kane**, **M. Dolors Benaiges** and **T. Tzedakis** 196 HLADH-catalyzed synthesis of β-amino acids, assisted by continuous electrochemical regeneration of NAD+ in a filter press microreactor

W. Liu, **X. Dong Chen** and **R. Mercadé-Prieto** 349 Spatial quantification of hydrogels swelling using wide-field fluorescence microscopy

R.A. Fernandes, **A.L. Daniel-da-Silva**, **A.P.M. Tavares** and **A.M.R.B. Xavier** 599 EDTA-Cu (II) chelating magnetic nanoparticles as a support for laccase immobilization

M. Gopi Kiran, **K. Pakshirajan** and **G. Das** 606 An overview of sulfidogenic biological reactors for the simultaneous treatment of sulfate and heavy metal rich wastewater

Materials Synthesis & Processing

M.-x. Xu, **Y. He**, **Y.-p. Wang** and **X.-m. Cui** 117 Preparation of a non-hydrothermal NaA zeolite membrane and defect elimination by vacuum-inhalation repair method

Z.-M. Xing, **Y.-X. Gao**, **L.-Y. Shi**, **X.-Q. Liu**, **Y. Jiang** and **L.-B. Sun** 216 Fabrication of gold nanoparticles in confined spaces using solid-phase reduction: Significant enhancement of dispersion degree and catalytic activity

Y. Chen, **J. Xiao**, **D. Lv**, **T. Huang**, **F. Xu**, **X. Sun**, **H. Xi**, **Q. Xia** and **Z. Li** 539 Highly efficient mechanochemical synthesis of an indium based metal-organic framework with excellent water stability

Particle Technology

I.J. Paredes, **B. Yohannes**, **H. Emady**, **B.J. Glasser**, **W.G. Borghard**, **F. Muzzio**, **A.M. Cuitiño**, **J. Beeckman**, **S. Ilias**, **P. Podsiadlo**, **E. Jezek** and **J. Baumgartner** 50 The effect of operating conditions on the residence time distribution and axial dispersion coefficient of a cohesive powder in a rotary kiln

A. Cahyadi, **A. Anantharaman**, **S. Yang**, **S.B.R. Karri**, **J.G. Findlay**, **R.A. Cocco** and **J.W. Chew** 70 Review of cluster characteristics in circulating fluidized bed (CFB) risers

C.Q. LaMarche, **S. Leadley**, **P. Liu**, **K.M. Kellogg** and **C.M. Hrenya** 140 Method of quantifying surface roughness for accurate adhesive force predictions

Y. Guo, **C. Wassgren**, **B. Hancock**, **W. Ketterhagen** and **J. Curtis** 314 Predicting breakage of high aspect ratio particles in an agitated bed using the Discrete Element Method

K.P. Galvin and **K. van Netten** 439 A new method for ultra-fast concentration of hydrophobic particles

O.S. Agimelen, **A.J. Mulholland** and **J. Sefcik** 445 Modelling of artefacts in estimations of particle size of needle-like particles from laser diffraction measurements

Process Systems Engineering

P. Ratnayake and **J. Bao** 1 Frequency domain constrained optimization of boundary control action for maximization of mixing in channel flow

T. Lemenand, **D.D. Valle**, **P. Dupont** and **H. Peerhossaini** 41 Turbulent spectrum model for drop-breakup mechanisms in an inhomogeneous turbulent flow

L.V. Pavão, **C.B.B. Costa** and **M.A.S.S.. Ravagnani** 96 Heat Exchanger Network Synthesis without stream splits using parallelized and simplified simulated Annealing and Particle Swarm Optimization

Y. He, **Y. Liang**, **Z. Liu** and **C.-W. Hui** 359 Improved exact and meta-heuristic methods for minimizing makespan of large-size SMSP

S. Sievers, **T. Seifert**, **M. Franzen**, **G. Schembecker** and **C. Bramsiepe** 395 Fixed capital investment estimation for modular production plants

S. Ghazouani, **A. Zoughaib** and **S.L. Bourdiec** 411 An MILP model for simultaneous mass allocation and heat exchange networks design

C.A. Dorao, **T. Langeland** and **M. Fernandino** 453 Effect of heating profile on the characteristics of pressure drop oscillations

Reaction Engineering, Kinetics and Catalysis

W. Yang, **Y. Wang**, **J. Zhou**, **J. Zhou**, **Z. Wang** and **K. Cen** 30 Catalytic self-sustaining combustion of the alkanes with Pt/ZSM-5 packed bed in a microscale tube

G. Nie, **X. Zhang**, **P. Han**, **J. Xie**, **L. Pan**, **L. Wang** and **J.-J. Zou** 64 Lignin-derived multi-cyclic high density biofuel by alkylation and hydrogenated intramolecular cyclization

A. Arvajová and **P. Kočí** 181 Impact of PtO_x formation in diesel oxidation catalyst on NO_2 yield during driving cycles

Y. Cao, **Y. Shi**, **J. Liang**, **Y. Wu**, **S. Huang**, **J. Wang**, **M. Yang** and **H. Hu** 188 High *iso*-alkanes production from palmitic acid over bi-functional Ni/H-ZSM-22 catalysts

M. Su, **C. Liao**, **P.-H. Lee**, **H. Li** and **K. Shih** 287 Formation and leaching behavior of ferrite spinel for cadmium stabilization

R. Sadegh-Vaziri and **M.U. Babler** 328 Numerical investigation of the outward growth of ZnS in the removal of H_2S in a packed bed of ZnO

D. Branco P., **G.S. Yablonsky**, **G.B. Marin** and **D. Constales** 370 Mapping the kinetic events in a linear two-step irreversible-reversible reaction mechanism

L. Negahdar, **M.G. Al-Shaal**, **F.J. Holzhäuser** and **R. Palkovits** 545 Kinetic analysis of the catalytic hydrogenation of alkyl levulinates to γ-valerolactone

Separation Processes

H. Guo, **S.J. Ki**, **S. Oh**, **Y.M. Kim**, **S. Wang** and **J.H. Kim** 21 Numerical simulation of separation process for enhancing fine particle removal in tertiary sedimentation tank mounting adjustable baffle

J. Gaspar and **P.L. Fosbøl** 257 Practical enhancement factor model based on GM for multiple parallel reactions: Piperazine (PZ) CO_2 capture

F. Anisi, **K.M. Thomas** and **H.J.M. Kramer** 277 Membrane-assisted crystallization: Membrane characterization, modelling and experiments

L. Wang, **Y. Wang**, **X. Yan**, **A. Wang** and **Y. Cao** 304 A numerical study on efficient recovery of fine-grained minerals with vortex generators in pipe flow unit of a cyclonic-static micro bubble flotation column

L. Joss, **M. Gazzani** and **M. Mazzotti** 381 Rational design of temperature swing adsorption cycles for post-combustion CO_2 capture
