Special Section - ESCAPE-26

L. Luo, F. Cheng, T. Qiu and J. Zhao	1	Refined convergent cross-mapping for disturbance propagation analysis of chemical processes
W.L. Luyben	17	Improving the conventional reactor/separation/recycle DME process
S.K. Verma, F. Fenila and Y. Shastri	23	Sensitivity analysis and stochastic modelling of lignocellulosic feedstock pretreatment and hydrolysis
P.S. Reddy, K.Y. Rani and S.C. Patwardhan	40	Multi-objective optimization of a reactive batch distillation process using reduced order model
Y. Du, H. Budman and T.A. Duever	57	Comparison of stochastic fault detection and classification algorithms for nonlinear chemical processes
S.S. Garud, I.A. Karimi and M. Kraft	71	Design of computer experiments: A review
D. Ha, U. Ahmed, H. Pyun, C.-J. Lee, K.H. Baek and C. Han	96	Multi-mode operation of principal component analysis with k-nearest neighbor algorithm to monitor compressors for liquefied natural gas mixed refrigerant processes
H. Shahandeh and Z. Li	106	Optimal design of bitumen upgrading facility with CO ₂ reduction
M. Almahdi, I. Dincer and M.A. Rosen	122	A new integrated heat pump option for heat upgrading in Cu-Cl cycle for hydrogen production
H. Cui and X. Luo	133	An improved Lagrangian relaxation approach to scheduling steelmaking-continuous casting process
R.W. Koller and L.A. Ricardez-Sandoval	147	A dynamic optimization framework for integration of design, control and scheduling of multi-product chemical processes under disturbance and uncertainty
A.I. Hinojosa, A. Ferramosca, A.H. González and D. Odloak	160	One-layer gradient-based MPC + RTO of a propylene/propane splitter
H. Liu, J. Cai and Y.-S. Ong	171	An adaptive sampling approach for Kriging metamodeling by maximizing expected prediction error

A. Garg, B. Corbett, P. Mhaskar, G. Hu and J. Flores-Cerrillo	183	Subspace-based model identification of a hydrogen plant startup dynamics
P. Bhavsar, B. Srinivasan and R. Srinivasan	191	Quantifying situation awareness of control room operators using eye-gaze behavior
X. Wang, K. Kvaal and H. Ratnaweera	202	Characterization of influent wastewater with periodic variation and snow melting effect in cold climate area
M. Nilashi, O.b. Ibrahim, H. Ahmadi and L. Shahmoradi	212	An analytical method for diseases prediction using machine learning techniques
S.E. Latifi, E. Mohammadi and N. Khakzad	224	Process plant layout optimization with uncertainty and considering risk
E. Ayotte-Sauvé, O. Ashrafi, S. Bédard and N. Rohani	243	Optimal retrofit of heat exchanger networks: A stepwise approach
N. Sebelebele and T. Majozi	269	Heat integration of multipurpose batch plants through multiple heat storage vessels
G. Xu and Y. Li	286	Steady-state optimization of biochemical systems by bi-level programming
M. Hennen, M. Lampe, P. Voll and A. Bardow	297	SPREAD – Exploring the decision space in energy systems synthesis
L.S. de Assis, E. Camponogara, B. Zimberg, E. Ferreira and I.E. Grossmann	309	A piecewise McCormick relaxation-based strategy for scheduling operations in a crude oil terminal
F. Maluta, A. Eaglesham, D. Jones, A. Komrakova and S.M. Kresta	322	A novel factorial design search to determine realizable constant sets for a multi-mechanism model of mixing sensitive precipitation
F. Hourfar, B. Moshiri, K. Salahshoor and A. Elkamel	339	Real-time management of the waterflooding process using proxy reservoir modeling and data fusion theory
H. Ensafian, S. Yaghoubi and M. Modarres Yazdi	355	Raising quality and safety of platelet transfusion services in a patient-based integrated supply chain under uncertainty
M.E. Cóccola, C.A. Méndez and R.G. Dondo	373	A decomposition framework for managing inventory and distribution of fluid products by an order-based-resupply methodology
T.T.H. Nguyen, S. Teratani, R. Tanaka, A. Endo and M. Hirao	385	A framework for developing a structure-based lumping kinetic model for the design and simulation of refinery reactors
D.A. Mellichamp	396	Internal rate of return: Good and bad features, and a new way of interpreting the historic measure
M. Glass and A. Mitsos	407	Thermodynamic analysis of formulations to discriminate multiple roots of cubic equations of state in process models
B. Bullocks, R. Suresh and R. Rengaswamy	421	Rapid impedance measurement using chirp signals for electrochemical system analysis
L. Fernández, J. Ortega and J. Wisniak	437	New computational tool to evaluate experimental VLE and VLLE data of multicomponent systems
C. Shang, X. Huang and F. You	464	Data-driven robust optimization based on kernel learning
T. Rodríguez-Blanco, D. Sarabia, J.L. Pitarch and C. de Prada	480	Modifier Adaptation methodology based on transient and static measurements for RTO to cope with structural uncertainty
A. Narasingam and J.S.-I. Kwon	501	Development of local dynamic mode decomposition with control: Application to model predictive control of hydraulic fracturing
T. Billa, S.R. Horton, M. Sahasrabudhe, C. Saravanan, Z. Hou, P. Agarwal, J. Lucio-Vega and M.T. Klein	512	Enhancing the value of detailed kinetic models through the development of interrogative software applications
