Influence of chemical composition of electrode material on the differential capacitance characteristics of the ionic liquid|electrode interface

Ove Oll, Tavo Romann, Carolin Siimenson, Enn Lust

PII: S1388-2481(17)30198-4
DOI: doi: [10.1016/j.elecom.2017.07.015](https://doi.org/10.1016/j.elecom.2017.07.015)
Reference: ELECOM 5990

To appear in: *Electrochemistry Communications*

Received date: 2 July 2017
Revised date: 19 July 2017
Accepted date: 20 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of chemical composition of electrode material on the differential capacitance characteristics of the ionic liquid | electrode interface

Ove Oll, Tavo Romann, Carolin Siimenson and Enn Lust*

Institute of Chemistry, University of Tartu, Ravila 14A, 50411 Tartu, Estonia
