Use of nanoscale mechanical stimulation for control and manipulation of cell behaviour

Peter G. Childs, Christina A. Boyle, Gabriel D. Pemberton, Habib Nikukar, Adam S.G. Curtis, Matthew J. Dalby, Stuart Reid

PII: S1742-7061(15)30221-X
DOI: <http://dx.doi.org/10.1016/j.actbio.2015.11.045>
Reference: ACTBIO 3997

To appear in: *Acta Biomaterialia*

Received Date: 13 July 2015
Revised Date: 25 September 2015
Accepted Date: 19 November 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Use of nanoscale mechanical stimulation for control and manipulation of cell behaviour
