

Accepted Manuscript

Title: Challenges and opportunities in lactic acid bioprocess design—From economic to production aspects

Authors: Regiane Alves de Oliveira, Andrea Komesu, Carlos Eduardo Vaz Rossell, Rubens Maciel Filho

PII: S1369-703X(18)30080-9
DOI: <https://doi.org/10.1016/j.bej.2018.03.003>
Reference: BEJ 6906

To appear in: *Biochemical Engineering Journal*

Received date: 9-8-2017
Revised date: 28-2-2018
Accepted date: 3-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Challenges and opportunities in lactic acid bioprocess design – From economic to production aspects

Regiane Alves de Oliveira ^a; Andrea Komesu ^b; Carlos Eduardo Vaz Rossell ^c; Rubens Maciel Filho ^a

^a Laboratory of Optimization, Design and Advanced Process Control, School of Chemical Engineering, University of Campinas – Unicamp. 500 Albert Einstein Av, Campinas. 13083-852. Brazil.

^b Department of Marine Sciences, Federal University of São Paulo – UNIFESP. 144 Carvalho de Mendonça St, Santos. 11070-100. Brazil.

^c Interdisciplinary Center of Energy Planning (NIPE), University of Campinas (Unicamp). Rua Cora Coralina, 330, Campinas, 13083-896, Brazil.

Highlights

- Many new applications for bio-based lactic acid are presented every year
- The forecast for the lactic acid market presents positive perspectives of growth
- Feedstocks used for lactic acid production still represent a challenge for the sector
- Genetically engineered micro-organisms demonstrate new possibilities for the sector
