

## Accepted Manuscript

Production of hemicellulosic sugars from sugarcane bagasse via steam explosion employing industrially feasible conditions: Pilot scale study

Marcos Henrique Luciano Silveira, Anuj Kumar Chandel, Bruno Angelo Vanelli, Karina Spagnol Sacilotto, Eliano Brito Cardoso

PII: S2589-014X(18)30060-4  
DOI: doi:[10.1016/j.biteb.2018.07.011](https://doi.org/10.1016/j.biteb.2018.07.011)  
Reference: BITEB 65

To appear in: *Bioresource Technology Reports*

Received date: 19 June 2018  
Revised date: 15 July 2018  
Accepted date: 16 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
