The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Biteb(2017), doi:[10.1016/j.biteb.2018.05.002](https://doi.org/10.1016/j.biteb.2018.05.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhanced ethyl levulinate production from citrus peels through an *in-situ* hydrothermal reaction

Jeongwoo Yang, Jeongseok Park, Jeesung Son, Bora Kim and Jae W. Lee*
