Cigarette Smoke Increases Pro-Inflammatory Markers and Inhibits Osteogenic Differentiation in Experimental Exposure Model

G.N. Cyprus, J.W. Overlin, K.M. Hotchkiss, S. Kandalam, R. Olivares-Navarrete

PII: S1742-7061(18)30361-1  
DOI: <https://doi.org/10.1016/j.actbio.2018.06.018>  
Reference: ACTBIO 5528

To appear in: *Acta Biomaterialia*

Received Date: 6 February 2018  
Revised Date: 1 June 2018  
Accepted Date: 8 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title:** Cigarette Smoke Increases Pro-Inflammatory Markers and Inhibits Osteogenic Differentiation in Experimental Exposure Model

**Authors:** G.N. Cyprus, J.W. Overlin, K.M. Hotchkiss, S. Kandalam, R. Olivares-Navarrete

**Affiliation:** Department of Biomedical Engineering, School of Engineering, Virginia Commonwealth University, Richmond, VA, United States

**Corresponding Author:**

Rene Olivares-Navarrete, DDS, PhD  
VCU School of Engineering
