Biological Evaluation and Finite-Element Modeling of Porous poly(para-phenylene) for Orthopaedic Implants

Hyunhee Ahn, Ravi R. Patel, Anthony J. Hoyt, Angela S.P. Lin, F. Brennan Torstrick, Robert E. Guldberg, Carl P. Frick, R. Dana Carpenter, Christopher M. Yakacki, Nick J. Willett

PII: S1742-7061(18)30145-4
DOI: <https://doi.org/10.1016/j.actbio.2018.03.025>
Reference: ACTBIO 5367

To appear in: *Acta Biomaterialia*

Received Date: 2 November 2017
Revised Date: 8 March 2018
Accepted Date: 13 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
