Full length article

Bone tissue engineering strategy based on the synergistic effects of silicon and strontium ions

Min Xing, Xiaoya Wang, Endian Wang, Long Gao, Jiang Chang

PII: S1742-7061(18)30182-X
DOI: <https://doi.org/10.1016/j.actbio.2018.03.051>
Reference: ACTBIO 5393

To appear in: *Acta Biomaterialia*

Received Date: 5 December 2017
Revised Date: 21 March 2018
Accepted Date: 29 March 2018

Please cite this article as: Xing, M., Wang, X., Wang, E., Gao, L., Chang, J., Bone tissue engineering strategy based on the synergistic effects of silicon and strontium ions, *Acta Biomaterialia* (2018), doi: <https://doi.org/10.1016/j.actbio.2018.03.051>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Bone tissue engineering strategy based on the synergistic effects of silicon and strontium ions

Min Xing^{a, b}, Xiaoya Wang^a, Endian Wang^{a, b}, Long Gao^{a, b}, Jiang Chang^{a, *}
