Controlling human corneal stromal stem cell contraction to mediate rapid cell and matrix organization of real architecture for 3-dimensional tissue equivalents

Dev Mukhey, James Phillips, Julie T Daniels, Alvena K Kureshi

PII: S1742-7061(17)30744-4  
DOI: <https://doi.org/10.1016/j.actbio.2017.11.047>  
Reference: ACTBIO 5200

To appear in: *Acta Biomaterialia*

Received Date: 30 May 2017  
Revised Date: 7 November 2017  
Accepted Date: 28 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Controlling human corneal stromal stem cell contraction to mediate rapid cell and matrix organization of real architecture for 3-dimensional tissue equivalents**
