Temporal development of near-native functional properties and correlations with qMRI in self-assembling fibrocartilage treated with exogenous LOXL2

Pasha Hadidi, Derek D. Cissell, Jerry C. Hu, Kyriacos A. Athanasiou

PII: S1742-7061(17)30607-4
DOI: <https://doi.org/10.1016/j.actbio.2017.09.035>
Reference: ACTBIO 5097

To appear in: *Acta Biomaterialia*

Received Date: 24 June 2017
Revised Date: 22 September 2017
Accepted Date: 25 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Temporal development of near-native functional properties and correlations with
qMRI in self-assembling fibrocartilage treated with exogenous LOXL2**
