

## Accepted Manuscript

Title: Biochemical and Metabolic Engineering Approaches to Enhance Production of Therapeutic Proteins in Animal Cell Cultures

Authors: Neil Templeton, Jamey D. Young

PII: S1369-703X(18)30127-X  
DOI: <https://doi.org/10.1016/j.bej.2018.04.008>  
Reference: BEJ 6928

To appear in: *Biochemical Engineering Journal*

Received date: 5-10-2017  
Revised date: 1-4-2018  
Accepted date: 16-4-2018

Please cite this article as: Templeton N, Young JD, Biochemical and Metabolic Engineering Approaches to Enhance Production of Therapeutic Proteins in Animal Cell Cultures, *Biochemical Engineering Journal* (2018), <https://doi.org/10.1016/j.bej.2018.04.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Biochemical and Metabolic Engineering Approaches to Enhance Production of Therapeutic Proteins in Animal Cell Cultures

### Highlights

- Protein therapeutics are the most expensive class of drugs to manufacture
- Biosimilars are driving trends toward lean manufacturing in the biopharma industry
- Production can be enhanced by improving cell density or cell-specific productivity
- Genetic and bioprocess engineering strategies can be used to increase productivity
