Poly(propylacrylic acid)-Peptide nanoplexes as a platform for enhancing the immunogenicity of neoantigen cancer vaccines

Feng Qiu, Kyle W. Becker, Frances C. Knight, Jessalyn J. Baljon, Sema Sevimli, Daniel Shae, Pavlo Gilchuk, Sebastian Joyce, John T. Wilson

PII: S0142-9612(18)30543-X

DOI: [10.1016/j.biomaterials.2018.07.052](https://doi.org/10.1016/j.biomaterials.2018.07.052)

Reference: JBMT 18795

To appear in: *Biomaterials*

Received Date: 26 April 2018

Revised Date: 26 July 2018

Accepted Date: 27 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Poly(propylacrylic acid)-Peptide Nanoplexes as a Platform for Enhancing the Immunogenicity of Neoantigen Cancer Vaccines
