

Accepted Manuscript

Injectable hyaluronic acid based microrods provide local micromechanical and biochemical cues to attenuate cardiac fibrosis after myocardial infarction

Long V. Le, Priya Mohindra, Qizhi Fang, Richard E. Sievers, Michael Mkrtschjan, Christopher Solis, Conrad W. Safranek, Brenda Russell, Randall J. Lee, Tejal A. Desai

PII: S0142-9612(18)30221-7

DOI: [10.1016/j.biomaterials.2018.03.042](https://doi.org/10.1016/j.biomaterials.2018.03.042)

Reference: JBMT 18568

To appear in: *Biomaterials*

Received Date: 28 November 2017

Revised Date: 22 March 2018

Accepted Date: 23 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Injectable hyaluronic acid based microrods provide local micromechanical and biochemical cues to attenuate cardiac fibrosis after myocardial infarction
