Metabolomics facilitates the discrimination of the specific anti-cancer effects of free- and polymer-conjugated doxorubicin in breast cancer models

Ana Armiñán, Martina Palomino-Schätzlein, Coralie Deladriere, Juan J. Arroyo-Crespo, Sonia Vicente-Ruiz, María Jesús Vicent, Antonio Pineda-Lucena

PII: S0142-9612(18)30093-0

DOI: [10.1016/j.biomaterials.2018.02.015](https://doi.org/10.1016/j.biomaterials.2018.02.015)

Reference: JBMT 18488

To appear in: *Biomaterials*

Received Date: 3 November 2017

Revised Date: 31 January 2018

Accepted Date: 7 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
