Manipulating human dendritic cell phenotype and function with targeted porous silicon nanoparticles

Sebastian O. Stead, Steven J.P. McInnes, Svjatlana Kireta, Peter D. Rose, Shilpanjali Jesudason, Darling Rojas-Canales, David Warther, Frédérique Cunin, Jean-Olivier Durand, Christopher J. Drogemuller, Robert P. Carroll, P. Toby Coates, Nicolas H. Voelcker

PII: S0142-9612(17)30747-0

DOI: [10.1016/j.biomaterials.2017.11.017](https://doi.org/10.1016/j.biomaterials.2017.11.017)

Reference: JBMT 18355

To appear in: *Biomaterials*

Received Date: 29 September 2017

Revised Date: 13 November 2017

Accepted Date: 16 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manipulating Human Dendritic Cell Phenotype and Function with Targeted Porous Silicon Nanoparticles
