Functional nanoparticles exploit the bile acid pathway to overcome multiple barriers of the intestinal epithelium for oral insulin delivery

Weiwei Fan, Dengning Xia, Quanlei Zhu, Xiuying Li, Shufang He, Chunliu Zhu, Shiyan Guo, Lars Hovgaard, Mingshi Yang, Yong Gan

PII: S0142-9612(17)30663-4

DOI: [10.1016/j.biomaterials.2017.10.022](https://doi.org/10.1016/j.biomaterials.2017.10.022)

Reference: JBMT 18304

To appear in: *Biomaterials*

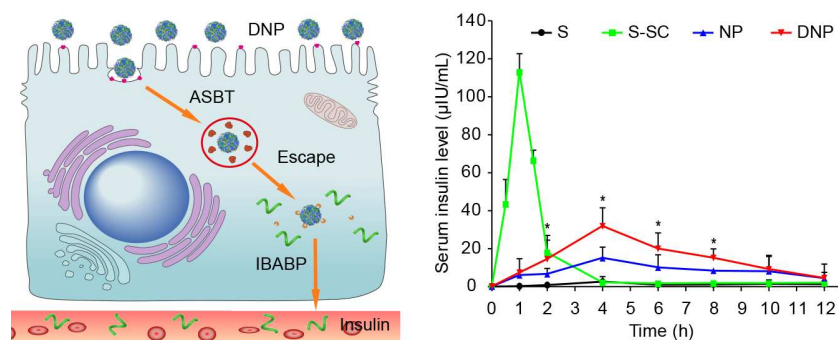

Received Date: 12 August 2017

Revised Date: 10 October 2017

Accepted Date: 11 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
