Surface delivery of tunable doses of BMP-2 from an adaptable polymeric scaffold induces volumetric bone regeneration

Michael Bouyer, Raphael Guillot, Jonathan Lavaud, Cedric Plettinx, Cécile Olivier, Véronique Curry, Jean Boutonnat, Jean-Luc Coll, Françoise Peyrin, Véronique Josserand, Georges Bettega, Catherine Picart

PII: S0142-9612(16)30249-6

DOI: [10.1016/j.biomaterials.2016.06.001](https://doi.org/10.1016/j.biomaterials.2016.06.001)

Reference: JBMT 17540

To appear in: *Biomaterials*

Received Date: 19 March 2016

Revised Date: 17 May 2016

Accepted Date: 1 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Surface delivery of tunable doses of BMP-2 from an adaptable polymeric scaffold induces volumetric bone regeneration
