This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Beyond malaria: The inhibition of viruses by artemisinin-type compounds

Thomas Efferth

Department of Pharmaceutical Biology, Institute of Pharmacy and Biochemistry, Johannes Gutenberg University, Staudinger Weg 5, 55128 Mainz, Germany

Tel.: 49-6131-3925751; E-mail: efferth@uni-mainz.de

Running title: Artemisinins against viruses

Key words: Antiviral therapy; *Artemisia annua*; Phytochemicals; Sesquiterpene
