Intracellular drug delivery: Potential usefulness of engineered Shiga toxin subunit B for targeted cancer therapy

Vera Luginbuehl, Nicolas Meier, Karin Kovar, Jack Rohrer

PII: S0734-9750(18)30021-1
DOI: [doi:10.1016/j.biotechadv.2018.02.005](https://doi.org/10.1016/j.biotechadv.2018.02.005)
Reference: JBA 7215
To appear in: *Biotechnology Advances*
Received date: 30 August 2017
Revised date: 30 January 2018
Accepted date: 5 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Intracellular drug delivery: potential usefulness of engineered Shiga toxin subunit B for targeted cancer therapy
