Title: C-PUGP: A Cluster-based Positive Unlabeled learning method for disease Gene Prediction and prioritization

Authors: Akram Vasighizaker, Saeed Jalili

PII: S1476-9271(17)30648-5
DOI: <https://doi.org/10.1016/j.compbiochem.2018.05.022>
Reference: CBAC 6872

To appear in: *Computational Biology and Chemistry*

Received date: 13-9-2017
Revised date: 14-4-2018
Accepted date: 27-5-2018

Please cite this article as: Vasighizaker, Akram, Jalili, Saeed, C-PUGP: A Cluster-based Positive Unlabeled learning method for disease Gene Prediction and prioritization. *Computational Biology and Chemistry* <https://doi.org/10.1016/j.compbiochem.2018.05.022>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

GRAPHICAL ABSTRACT

Highlight

- A novel PU learning method is proposed to identify & prioritize disease genes.
- The method is based on clustering and one class classification algorithm.
