Title: Molecular dynamics simulation studies suggests unconventional roles of non-secretary laccases from enteropathogenic gut bacteria and *Cryptococcus neoformans* serotype D

Authors: Krishna Kant Sharma, Deepti Singh, Surender Rawat

PII: S1476-9271(17)30358-4
DOI: <https://doi.org/10.1016/j.combiolchem.2018.01.010>
Reference: CBAC 6781

To appear in: *Computational Biology and Chemistry*

Received date: 26-5-2017
Revised date: 28-9-2017
Accepted date: 23-1-2018

Please cite this article as: Sharma, Krishna Kant, Singh, Deepti, Rawat, Surender, Molecular dynamics simulation studies suggests unconventional roles of non-secretary laccases from enteropathogenic gut bacteria and *Cryptococcus neoformans* serotype D. *Computational Biology and Chemistry* <https://doi.org/10.1016/j.combiolchem.2018.01.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

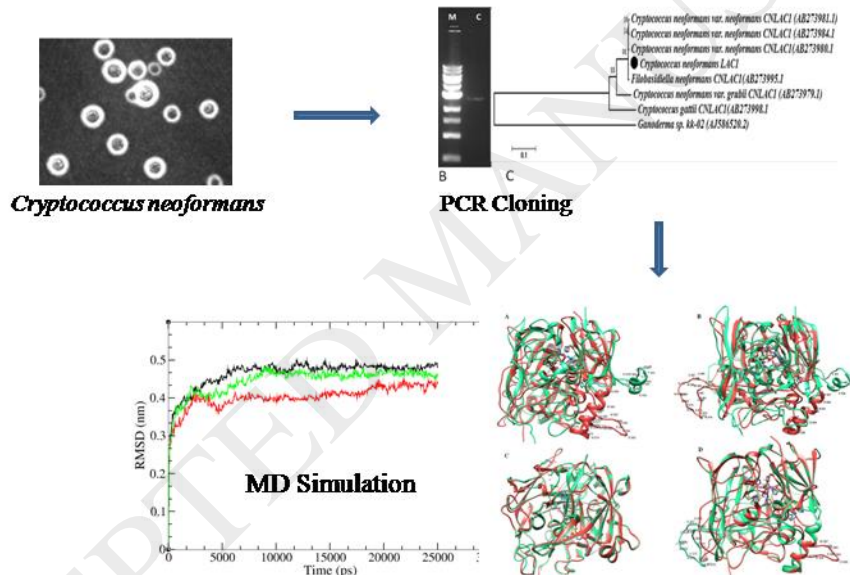

Molecular dynamics simulation studies suggests unconventional roles of non-secretory laccases from enteropathogenic gut bacteria and *Cryptococcus neoformans* serotype D

Krishna Kant Sharma,* Deepti Singh and Surender Rawat
