Title: A Comparative Computational Investigation on the Proton and Hydride Transfer Mechanisms of Monoamine Oxidase Using Model Molecules

Author: Vildan Enis Atalay Safiye Sağ Erdem

PII: S1476-9271(13)00080-7

DOI: <http://dx.doi.org/doi:10.1016/j.compbiolchem.2013.08.007>

Reference: CBAC 6284

To appear in: *Computational Biology and Chemistry*

Received date: 29-6-2013

Revised date: 16-8-2013

Accepted date: 19-8-2013

Please cite this article as: Atalay, V.E., Erdem, S.S., A Comparative Computational Investigation on the Proton and Hydride Transfer Mechanisms of Monoamine Oxidase Using Model Molecules, *Computational Biology and Chemistry* (2013), <http://dx.doi.org/10.1016/j.compbiolchem.2013.08.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript

Which mechanism is more favorable for FAD catalyzed amine oxidation?
