

Accepted Manuscript

Title: Stability of lipases in miniemulsion systems:
Correlation between secondary structure and activity

Authors: Ana C.D. Pfluck, Dragana P.C. de Barros, Luís P.
Fonseca, Eduardo P. Melo

PII: S0141-0229(18)30107-8
DOI: <https://doi.org/10.1016/j.enzmictec.2018.03.003>
Reference: EMT 9190

To appear in: *Enzyme and Microbial Technology*

Received date: 17-7-2017
Revised date: 11-3-2018
Accepted date: 12-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Stability of lipases in miniemulsion systems: Correlation between secondary structure and activity
