Title: Feasibility of installing and maintaining anaerobiosis using *Escherichia coli* HD701 as a facultative anaerobe for hydrogen production by *Clostridium acetobutylicum* ATCC 824 from various carbohydrates

Author: Sedky H.A. Hassan Fatthy Mohamed Morsy

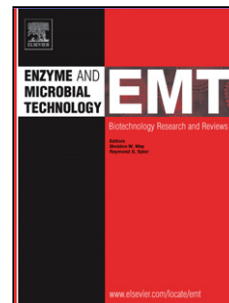

PII: S0141-0229(15)30037-5
DOI: <http://dx.doi.org/doi:10.1016/j.enzmictec.2015.08.002>
Reference: EMT 8793

To appear in: *Enzyme and Microbial Technology*

Received date: 23-5-2015
Revised date: 23-7-2015
Accepted date: 9-8-2015

Please cite this article as: Hassan Sedky HA, Morsy Fatthy Mohamed. Feasibility of installing and maintaining anaerobiosis using *Escherichia coli* HD701 as a facultative anaerobe for hydrogen production by *Clostridium acetobutylicum* ATCC 824 from various carbohydrates. *Enzyme and Microbial Technology* <http://dx.doi.org/10.1016/j.enzmictec.2015.08.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Feasibility of installing and maintaining anaerobiosis using *Escherichia coli***
2 **HD701 as a facultative anaerobe for hydrogen production by *Clostridium***
3 ***acetobutylicum* ATCC 824 from various carbohydrates**
