Title: The influence of water activity and molecular mobility on pectinmethylesterase activity in salt and glucose-maltodextrin model systems

Authors: Lilia Neri, Carla D. Di Mattia, Giampiero Sacchetti, Paola Pittia, Dino Mastrocola

PII: S0960-3085(17)30128-1
DOI: <https://doi.org/10.1016/j.fbp.2017.10.003>
Reference: FBP 913

To appear in: *Food and Bioproducts Processing*

Received date: 26-2-2017
Revised date: 11-9-2017
Accepted date: 7-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The influence of water activity and molecular mobility on pectinmethylesterase activity in salt and glucose-maltodextrin model systems

Lilia Neri, Carla D. Di Mattia, Giampiero Sacchetti*, Paola Pittia & Dino Mastrocola.
