Title: Reactive species monitoring and their contribution for removal of textile effluent with photocatalysis under UV and visible lights: dynamics and mechanism

Authors: Hichem Zeghioud, Aymen Amine Assadi, Nabila Khellaf, Hayet Djelal, Abdeltif Amrane, Sami Rtimi

PII: S1010-6030(18)30117-5
DOI: <https://doi.org/10.1016/j.jphotochem.2018.07.031>
Reference: JPC 11397

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 25-1-2018
Revised date: 13-7-2018
Accepted date: 21-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Reactive species monitoring and their contribution for removal of textile effluent with photocatalysis under UV and visible lights: dynamics and mechanism
