

Accepted Manuscript

Title: Carbon Nanodots as an Efficient Photosensitizer to Enhance Visible-Light Driven Photocatalytic Activity

Authors: Khalid M. Omer, Nian N. Mohammad, Shirwan O. Baban, Aso Q. Hassan

PII: S1010-6030(18)30268-5
DOI: <https://doi.org/10.1016/j.jphotochem.2018.05.041>
Reference: JPC 11311

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 27-2-2018
Revised date: 18-5-2018
Accepted date: 28-5-2018

Please cite this article as: Omer KM, Mohammad NN, Baban SO, Hassan AQ, Carbon Nanodots as an Efficient Photosensitizer to Enhance Visible-Light Driven Photocatalytic Activity, *Journal of Photochemistry and Photobiology, A: Chemistry* (2018), <https://doi.org/10.1016/j.jphotochem.2018.05.041>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Carbon Nanodots as an Efficient Photosensitizer to Enhance Visible-Light Driven Photocatalytic Activity
