Title: Removal of ciprofloxacin from water by nitrogen doped TiO<sub>2</sub> immobilized on glass spheres: Rapid screening of degradation products

Authors: Xuebin Xing, Zhenxia Du, Jingcong Zhuang, Di Wang

PII: S1010-6030(17)31731-8  
DOI: <https://doi.org/10.1016/j.jphotochem.2018.03.026>  
Reference: JPC 11195

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 24-11-2017  
Revised date: 21-2-2018  
Accepted date: 18-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Removal of ciprofloxacin from water by nitrogen doped TiO<sub>2</sub> immobilized on glass spheres: rapid screening of degradation products

Xuebin Xing, Zhenxia Du\*, Jingcong Zhuang, Di Wang

*Analysis and Testing Center, Beijing University of Chemical Technology, Beijing  
100029, China*

## Graphical abstract

## Highlights

- N-TiO<sub>2</sub> with different dosages were prepared to improve the optical absorption of TiO<sub>2</sub> in visible light.
