Title: Molybdenum-substituted polyoxometalate as stable shuttle redox mediator for visible light driven Z-scheme water splitting system

Authors: Yukari Iwase, Osamu Tomita, Hiroki Naito, Masanobu Higashi, Ryu Abe

PII: S1010-6030(17)31714-8
DOI: <https://doi.org/10.1016/j.jphotochem.2017.12.034>
Reference: JPC 11072

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 21-11-2017
Revised date: 22-12-2017
Accepted date: 24-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Molybdenum-substituted polyoxometalate as stable shuttle redox mediator for visible light driven Z-scheme water splitting system
