Melanins from two selected isolates of *Pseudocercospora griseola* grown in-vitro: Chemical features and redox activity

Alejandra Bárcena, Mariela Bruno, Ana Gennaro, M. Fernanda Rozas, María V. Mirífico, Pedro A. Balatti, Mario C.N. Saparrat

PII: S1011-1344(18)30577-3

DOI: doi:[10.1016/j.jphotobiol.2018.07.019](https://doi.org/10.1016/j.jphotobiol.2018.07.019)

Reference: JPB 11305

To appear in: *Journal of Photochemistry & Photobiology, B: Biology*

Received date: 29 May 2018

Revised date: 16 July 2018

Accepted date: 23 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Melanins from two selected isolates of *Pseudocercospora griseola* grown in-vitro: chemical features and redox activity.
