

## Accepted Manuscript

Carnosine-graphene oxide conjugates decorated with hydroxyapatite as promising nanocarrier for ICG loading with enhanced antibacterial effects in photodynamic therapy against *Streptococcus mutans*

Elham Gholibegloo, Ashkan Karbasi, Maryam Pourhajibagher, Nasim Chiniforush, Ali Ramazani, Tayebah Akbari, Abbas Bahador, Mehdi Khoobi

PII: S1011-1344(17)31493-8

DOI: <https://doi.org/10.1016/j.jphotobiol.2018.02.004>

Reference: JPB 11138

To appear in: *Journal of Photochemistry & Photobiology, B: Biology*

Received date: 11 December 2017

Revised date: 19 January 2018

Accepted date: 5 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Carnosine-graphene oxide conjugates decorated with hydroxyapatite as promising nanocarrier for ICG loading with enhanced antibacterial effects in photodynamic therapy against *Streptococcus mutans*
