

Accepted Manuscript

To reveal the nature of interactions of human hemoglobin with gold nanoparticles having two different morphologies (sphere and star-shaped) by using various spectroscopic techniques

Madhurima Chakraborty, Somnath Paul, Ishani Mitra, Munmun Bardhan, Mridul Bose, Abhijit Saha, Tapan Ganguly

PII: S1011-1344(17)31094-1
DOI: doi:[10.1016/j.jphotobiol.2017.11.026](https://doi.org/10.1016/j.jphotobiol.2017.11.026)
Reference: JPB 11068

To appear in: *Journal of Photochemistry & Photobiology, B: Biology*

Received date: 29 August 2017
Revised date: 6 November 2017
Accepted date: 20 November 2017

Please cite this article as: Madhurima Chakraborty, Somnath Paul, Ishani Mitra, Munmun Bardhan, Mridul Bose, Abhijit Saha, Tapan Ganguly , To reveal the nature of interactions of human hemoglobin with gold nanoparticles having two different morphologies (sphere and star-shaped) by using various spectroscopic techniques. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Jpb*(2017), doi:[10.1016/j.jphotobiol.2017.11.026](https://doi.org/10.1016/j.jphotobiol.2017.11.026)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

To reveal the nature of interactions of Human Hemoglobin with gold nanoparticles having two different morphologies (sphere and star-shaped) by using various spectroscopic techniques
