Title: Photoresponsive supramolecular self-assemblies at the liquid/solid interface

Authors: Denis Frath, Soichi Yokoyama, Takashi Hirose, Kenji Matsuda

PII: S1389-5567(17)30110-7
DOI: <https://doi.org/10.1016/j.jphotochemrev.2017.12.005>
Reference: JPR 284

To appear in: *Journal of Photochemistry and Photobiology C: Photochemistry Reviews*

Received date: 1-9-2017
Revised date: 18-12-2017
Accepted date: 20-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Photoresponsive supramolecular self-assemblies at the liquid/solid interface

Denis Frath¹, Soichi Yokoyama², Takashi Hirose, and Kenji Matsuda*

Graphical Abstract

Highlights:

- An overview of advances on photoresponsive supramolecular self-assemblies formed at the liquid/solid interface is given.
- The photoresponsive assembly studied by STM at the liquid/solid interface are compared with the systems under ultra-high vacuum or at air/solid interface.
