

Author's Accepted Manuscript

Combination of type II fatty acid biosynthesis enzymes and thiolases supports a functional β -oxidation reversal

James M. Clomburg, Stephanie C. Contreras,
Alexander Chou, Justin B. Siegel, Ramon Gonzalez

www.elsevier.com/locate/ymben

PII: S1096-7176(17)30365-8
DOI: <https://doi.org/10.1016/j.ymben.2017.11.003>
Reference: YMBEN1312

To appear in: *Metabolic Engineering*

Received date: 22 September 2017
Revised date: 13 October 2017
Accepted date: 4 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Combination of type II fatty acid biosynthesis enzymes and thiolases supports a functional
 β -oxidation reversal**
