

Author's Accepted Manuscript

A modular metabolic engineering approach for the production of 1,2-propanediol from glycerol by *Saccharomyces cerevisiae*

Zia-ul Islam, Mathias Klein, Maximilian R. Aßkamp, Anders S.R. Ødum, Elke Nevoigt

PII: S1096-7176(17)30189-1
DOI: <https://doi.org/10.1016/j.ymben.2017.10.002>
Reference: YMBEN1297

To appear in: *Metabolic Engineering*

Received date: 9 June 2017
Revised date: 6 September 2017
Accepted date: 4 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A modular metabolic engineering approach for the production of 1,2-propanediol from glycerol by *Saccharomyces cerevisiae*
