Title: Scientific Underpinnings of Biotechnology Regulatory Frameworks

Authors: Savannah Gleim, Stuart J. Smyth

PII: S1871-6784(17)30388-6
DOI: <https://doi.org/10.1016/j.nbt.2018.01.004>
Reference: NBT 1048

To appear in:

Received date: 25-7-2017
Revised date: 29-11-2017
Accepted date: 15-1-2018

Please cite this article as: Gleim, Savannah, Smyth, Stuart J., Scientific Underpinnings of Biotechnology Regulatory Frameworks. *New Biotechnology* <https://doi.org/10.1016/j.nbt.2018.01.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Scientific Underpinnings of Biotechnology Regulatory Frameworks

Highlights

- Limited documentation of biotechnology research within the formation of policy and regulations.
- Early formation of biotech regulation featured little overlap of research between international policy makers.
- Evidence of scientific underpinnings of biotech regulations lacks transparency and trust.
