Title: Glu56Ser mutation improves the enzymatic activity and catalytic stability of *Bacillus subtilis* L-aspartate α -decarboxylase for an efficient β -alanine production

Authors: Tenghui Zhang, Rongzhen Zhang, Meijuan Xu, Xian Zhang, Taowei Yang, Fei Liu, Shangtian Yang, Zhiming Rao

PII: S1359-5113(17)31887-1
DOI: <https://doi.org/10.1016/j.procbio.2018.04.004>
Reference: PRBI 11320

To appear in: *Process Biochemistry*

Received date: 11-12-2017
Revised date: 3-4-2018
Accepted date: 4-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Glu56Ser mutation improves the enzymatic activity and catalytic stability of *Bacillus subtilis* L-aspartate α -decarboxylase for an efficient β -alanine production
