Title: Surface Electric Field Driven Directional Charge Separation on Ta₃N₅ Cuboids Enhancing Photocatalytic Solar Energy Conversion

Authors: Chenguang Zhou, Junkang Zhou, Lei Lu, Jiajia Wang, Zhan Shi, Bing Wang, Lang Pei, Shicheng Yan, Zhentao Yu, Zhigang Zou

PII: S0926-3373(18)30571-X
DOI: <https://doi.org/10.1016/j.apcatb.2018.06.036>
Reference: APCATB 16784

To appear in: *Applied Catalysis B: Environmental*

Received date: 6-4-2018
Revised date: 31-5-2018
Accepted date: 12-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Surface Electric Field Driven Directional Charge Separation on Ta₃N₅ Cuboids Enhancing Photocatalytic Solar Energy Conversion
