This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

Highlights

- ▶ Anthraquinone from organic-solvent-based and energy-intensive industrial H_2O_2 production processes was demonstrated as a co-catalyst for the photocatalytic H_2O_2 production.
