Title: Plasmonic Cu nanoparticle on reduced graphene oxide nanosheet support: an efficient photocatalyst for improvement of near-infrared photocatalytic H₂ evolution

Authors: Piyong Zhang, Ting Song, Tingting Wang, Heping Zeng

PII: S0926-3373(17)31142-6
DOI: <https://doi.org/10.1016/j.apcatb.2017.11.076>
Reference: APCATB 16228

To appear in: *Applied Catalysis B: Environmental*

Received date: 3-7-2017
Revised date: 29-9-2017
Accepted date: 28-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Plasmonic Cu nanoparticle on reduced graphene oxide nanosheet support: an efficient photocatalyst for improvement of near-infrared photocatalytic H₂ evolution

Piyong Zhang, Ting Song, Tingting Wang, Heping Zeng*
