Title: Enhancing sulfacetamide degradation by
peroxymonosulfate activation with N-doped graphene
produced through delicately-controlled nitrogen
functionalization via tweaking thermal annealing processes

Authors: Xiao Chen, Wen-Da Oh, Zhong-Ting Hu, Yuan-Miao
Sun, Richard D. Webster, Shu-Zhou Li, Teik-Thye Lim

PII: S0926-3373(17)31137-2
DOI: <https://doi.org/10.1016/j.apcatb.2017.11.071>
Reference: APCATB 16223

To appear in: *Applied Catalysis B: Environmental*

Received date: 18-8-2017
Revised date: 30-10-2017
Accepted date: 27-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhancing sulfacetamide degradation by peroxymonosulfate activation with N-doped graphene produced through delicately-controlled nitrogen functionalization via tweaking thermal annealing processes
