Title: Multifunctional catalyst for maximizing NO_x oxidation/storage/reduction. The role of the different active sites

Author: E. Palomares A. Uzcátegui C. Franch A. Corma

PII: S0926-3373(13)00398-6
DOI: <http://dx.doi.org/doi:10.1016/j.apcatb.2013.06.015>
Reference: APCATB 12751

To appear in: *Applied Catalysis B: Environmental*

Received date: 12-4-2013
Revised date: 13-6-2013
Accepted date: 17-6-2013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Multifunctional catalyst for maximizing NO_x oxidation/storage/reduction. The role of the different active sites.

A. E. Palomares*, A. Uzcátegui, C. Franch, A. Corma

Instituto de Tecnología Química, (Universidad Politécnica de Valencia-CSIC), Avenida de los Naranjos s/n. 46022-Valencia (Spain).
